

# ILOG Training Services

## Training Services

ILOG's comprehensive training programs are the fastest and most efficient way for you to learn how to work with ILOG products. The practical hands-on experience you gain from a few days of ILOG training and the assistance of ILOG Consulting can reduce your evaluation or application development cycle by weeks or even months.

We offer instructor-led training courses at our U.S. Training Centers in Arlington, VA, and Sunnyvale, CA. Check our website for world wide training locations.

Our courses combine lectures with hands-on laboratory exercises. You can immediately apply your knowledge to building complete applications.

## Training courses feature

- **Small class sizes**  
Recommended class size eight students
- **Computer for every two students**
- **Comprehensive materials**  
You receive a take-home copy of all the instructor's slides. You work with specially-written programming exercises and sample applications. All courses are regularly up-dated to ensure that they incorporate new product features.
- **Experienced instructors**  
Our instructors are experienced users of ILOG products. They give you examples and insight from working in the field with the products.

## On-site training

In addition to scheduled training courses, we also offer on-site training. These courses can be based on the standard training materials or tailored to meet your specific needs.
